

As a tax paying American citizen & consumer I urge you to reject the NAB's petition 04-160. I believe that I have a right to subscribe to the service which can provide me with the best and most accurate reports in traffic and weather, no one that I have found has provided such services to my satisfaction as XM Sattellite Radio has done, and should continue to be allowed to do so in accordance with their Constitutional Rights, as well as yours & mine.
